

## Wheeldon Brothers Waste Limited

### Environmental Policy

Wheeldon Brothers Waste Ltd is a family owned business with a strong and long-established reputation for providing professional, reliable and cost-effective waste management and recycling services across the north west region from its sites in Bury, Ramsbottom and Oldham,

With a client base that ranges from large public organisations and private sector companies down to private individuals, the company provides a diversity of services from one-off waste collection and disposal activity to fully inclusive and comprehensive waste management.

Wheeldon Brothers Waste Ltd has worked hard to increase recycling rates and thereby reduce the amount of waste being sent to land fill and as a result is now as at the forefront of the waste management sector in the north west.

The company has therefore come to recognise the critical importance attached to securing a sustainable future for all through ensuring the earth's resources are used efficiently and that the environment is protected and nurtured both for current and future generations

Recognising that in the delivery of its services and activities it can and does have a broad range of local, national and global environmental impacts, the company has therefore implemented an Environmental Management System (EMS) to ensure it will prevent, control or minimise any impact to the environment arising from its operations and activities wherever possible.

In order to ensure the environmental management system is implemented effectively across all aspects of the company, the following key commitments have been adopted:

- To comply with all relevant environmental legislation, codes of practice, and any other requirements to which the company subscribes
- To prevent the likelihood and severity of environmental pollution arising from company activities whenever and wherever possible
- To continually improve the environmental performance of the company through setting and reviewing, annually as minimum, relevant objectives and targets
- To ensure contractors, sub-contractors and employees are aware of, and work in accordance with, the commitments of this Environmental Policy
- To display this policy at all sites and ensure it is made publicly available as requested
- To ensure compliance with this Environmental Policy through undertaking regular audits and monitoring and measuring the performance of the (EMS)
- This Environmental Policy will be reviewed annually as a minimum
